- **Software & Tools:** | MS Excel | Linux |
- **Relevant Coursework:** | Computer Networks | Data Structure | OOPs |
- **Web :** | HTML | CSS |
- **Databases:** | MySQL |

Projects

Personal Portfolio Website

A portfolio is a collection of academic and professional materials that showcase our values, ideas, abilities, qualifications, education, training, and experiences. It reveals information about our personality as well as our work ethic.

SMART SAFE: Next Generation Alcohol Testing Device

A prototype using Arduino board and is used to display whether alcohol is detected or not using a sensor and an LCD display. Alcohol detector are often devices that test breath to determine the amount of ethanol present in a person's system. When a drunk person breaths close to an alcohol sensor, the sensor detects the ethanol in his breath and outputs data dependent on the amount of alcohol in his breath.

Clone Website: Usability Hub

It is a clone website which i have done using html and CSS. Here I have divided it into different sections like top-banner section, navbar section, features section, footer and sub-footer section etc. and the options are hoverable and then I have used flexbox which helps us to organize our elements easily.

Achievements and Certifications

- Awarded a scholarship for Bachelor by the Indian government under the SII Scholarship scheme (2020-2024).
- Certificate of the Flipkart GRID 5.0 - Software Development Track -"On completing the Level 1.1: E-Commerce & Tech Quiz".

Languages

- English
